Creative Bicycle Design And Framebuilding [PDF, EPUB EBOOK]

It tends to be rather prescriptive of how to build, building a bike entirely determined by the angles of the lugs. It also tends to be repetitive and is stuffed full of acronyms. I have some sympathy for the author's assertions that framebuilding courses are expensive and in the USA may be prohibitively far away, but that hardly applies in the UK.

Creative Bicycle design and frame building review ...

The first step in building a frame is to design the frame you intend to build. There are lots of different opinions, techniques and algorithms to sizing a bike frame to a specific rider. I will not go in to detail about bike fit. There are many ways to draw your frame. You can use any old CAD software, bike specific CAD or a drafting table ...

The Simplest Bicycle Framebuilding Jig I Could Come Up With...: Here's a jig for building bicycle frames. This design is something I've been slowly picking away at for several years. Being both a cheapskate and not having much in the terms of machine tools and/or skills to use them, I've slowly come up with th...

The Simplest Bicycle Framebuilding Jig I Could Come Up ...

Some randonneur, bikepacking or light touring bikes are designed with less trail than even a road race bike (sub-40mm). The idea is that a quicker steering speed is offset by the heavier steering input of a front load. On a bike with road handlebars using a sub-10kg (22lbs) front load, I tend to really like this design approach.
