After explaining the main theoretical principles, it develops a history of the application of this epistemology in archaeology, focusing particularly on the tasks of classification and sequencing of data and thus entering into the current field of cultural phylogenetics.

## **(PDF) Darwinian Archaeology and Cultural Phylogenetics**

Cultural artefacts, like genes and languages, reflect their history. The methodology of inference of that history, however, has been a contentious question. Recent applications of biological phylogenetic methodology to infer historical patterns of material culture are often explicitly justified on the grounds that
