Of acceptable risk. Science and the determination of safety (Lowrance, William W.)

Of acceptable risk. Science and the determination of ...

The idea that there is (there must be) an 'acceptable' level of risk, and that the function of scientists and technologists is to determine what the risks are, and to determine what risks ARE 'acceptable' is debatable, and it's not really debated here, because the author tends to assume that 'experts' are better able than 'untrained' people to accurately make these decisions; which is not only elitist, but not accurate.

Of Acceptable Risk: Science and the Determination of ...

Of Acceptable Risk: Science and the Determination of Safety. Lowrance, William W. This book looks at the problems of determination of safety and the underlying concept of safety itself. It is believed that if certain pervasive themes are properly appreciated, the whole field of safety will be better understood.
