Unanswered. Long story short: a teacher of mine wants us to program a game we are by far not experienced enough to program. Because, in theory, my game is so simple, for an experienced programmer it's probably easily and quickly done. That's why I need a subreddit in which I can ask if any experienced Java ...

These types of connections are text-to-text connections. Readers gain insight during reading by thinking about how the information they are reading connects to other familiar text. “This character has the same problem that I read about in a story last year,” would be an example of a text-to-text connection.
